This will take you to this screen where you allow others to join and type in an 8 digit password.

The next step is to connect the student device to the hot spot. Look for the time/settings on the bottom right of the screen and click on it.

This next screen will look like this. Click on the Wi Fi icon.

Click on the wi-fi for your iPhone. You will then be prompted to enter the password that you put in your iPhone settings.

That's it! You should be connected now.
