TO : Clarissa Nace, Principal
FROM : Joshua Putt, HVAC Technician/Asbestos Supervisor
SUBJECT: Middle School's Semi-Annual Asbestos Update
DATE : Jul 1st, 2018
CC : Dr. Richard Fry, Superintendent

In accordance with state and federal asbestos management guidance, I have compiled all available data during the last six months (December 31, 2017 – July 1, 2018). During this time I found that the asbestos has remained basically intact for the last six months.

The majority of accessible asbestos products were removed by December 15, 2005 prior to the complete renovation of this facility. The asbestos remaining in the auditorium wall chases, VCT tile, and upper wall acoustic material was abated by American Capital Insulation Inc. in the summer of 2018.

The only remaining asbestos material is encased behind the original 1954 blackboards and bulletin boards not removed during building renovations.

Compliance Management International conducted our triennial re-inspection and management plan on July 28th of 2016. The next triennial inspection is schedule for 2019. Asbestos Hazard Emergency Response Act (AHERA) law requires each school, kindergarten through twelfth grade, to maintain these reports with their asbestos plan, available to the public. A copy of the report is available in the school office and will be made available to the public upon request.
