---

In accordance with state and federal asbestos management guidance, I have compiled all available data during the last six months (December 31, 2018 – July 1, 2019). During this time I have found that the asbestos has remained basically intact for the last six months.

During June, July and August of 2018 the windows and flooring, both know to contain asbestos, were removed from the building. The only area containing asbestos is the floor tile under the carpet in the office suite.

The Big Spring School District certified asbestos supervisor conducted the triennial re-inspection and management plan on July 1, 2019. The next triennial inspection is scheduled for 2022. Asbestos Hazard Emergency Response Act (AHERA) law requires each school, kindergarten through twelfth grade, to maintain these reports with their asbestos plan, available to the public. A copy of the report is available in the school office and will be made available to the public upon request.
